SUMMARY

Computer Systems Engineer with over 3 years of experience in full-stack software development and platform engineering, actively involved in building, deploying, and maintaining end-to-end features (backend + frontend). Strong expertise in API integrations, Node.js, JavaScript (ES6+), SQL databases, and web interface development, with solid experience in Level 2 technical support, QA, monitoring, continuous improvement, and Agile methodologies.

Throughout my career, I have contributed to highly technical, collaborative, and fast-growing environments, participating in product discussions, code reviews, production support, and technical decision-making.

EXPERIENCE

Platform Engineer

January 2023 – September 2025

PixelPay – Payment Gateway | San Pedro Sula, Cortés, Honduras (Remote)

- Developed and enhanced end-to-end features for APIs and SDKs in JavaScript, PHP, Java, Python, Ruby, and React Native, ensuring production stability and compatibility.
- Coordinated over 100 API and SDK integrations, reducing implementation errors by 30% and improving the external developer experience.
- Built and improved features on Laravel-based platforms and internal systems, enhancing performance and user experience.
- Actively contributed to technical decision-making, code optimization, and refactoring, applying SOLID principles.
- Implemented monitoring, alerting, and observability tools, ensuring 99%+ platform availability.
- Led Level 2 technical support for merchants and banking partners, handling 40+ tickets per month with a 99% resolution rate within SLA.

Full Stack Developer

November 2021 – December 2022

I-Technology | San Pedro Sula, Cortés, Honduras (Remote)

- Developed full-stack features using PHP (MVC), JavaScript, HTML, CSS, MS SQL, and modern development tools.
- Built an internal technical support web application, improving operational efficiency by 80%.
- Designed and implemented responsive, modern user interfaces for corporate clients, following UI/UX best practices.
- Worked under Agile/Scrum methodologies, contributing to continuous process and code improvements.

Full Stack Developer

September 2020 – December 2020

I-Technology | San Pedro Sula, Cortés, Honduras (Remote)

- Contributed to backend development using Node.js and Express.js, building REST APIs for enterprise systems.
- Implemented interfaces with HTML, CSS/SASS, JavaScript, jQuery, and Bootstrap, improving user experience by 40%.

EDUCATION

Universidad Católica de Honduras

January 2016 – December 2020

- Bachelor's Degree in Computer Science – Summa Cum Laude

COURSES & CERTIFICATIONS

PCI DSS Awareness and Secure Development Training	2023-2025
Agile Methodologies / Scrum	2024
Diploma in English for International Communication	2020
Diploma in Total Quality Management	2020

SKILLS

- **Idiomas:** Spanish (Native), English (B1–B2)
- **Programming Languages & Frameworks:** JavaScript (ES6+), TypeScript, PHP, Java, Python, Ruby, Node.js, Express.js, HTML5, CSS3, SASS, Bootstrap, Tailwind, jQuery, React, Jest, Vitest.
- **Databases:** MySQL, MS SQL, PostgreSQL, MongoDB.
- **Tools & Platforms:** Laravel Telescope, Sentry, Mezmo, Grafana, Jira, ClickUp, Confluence, Notion, Google Workspace, Zendesk Suite (Tickets, API, Macros, Explore), Postman, Docker, Git, GitHub, Bitbucket, SonarCloud, Laravel Vapor, CI/CD Pipelines, Android Studio, VS Code.
- **Security & Compliance:** PCI DSS, secure development, and information security best practices.
- **Soft Skills:** Analytical thinking, problem-solving, teamwork, continuous learning, and technical communication.
